CAITLIN HERMANUS

Web Development | Software Development | Cybersecurity

Gqeberha, South Africa | caitzhermanus@gmail.com | 061 272 9281 | github.com/caitz1310

PROFILE

IT professional with training in web development, software development and cybersecurity. Hands-on experience includes building responsive WordPress websites, developing web and desktop applications, and working with databases and locally hosted AI tools. Practical cybersecurity experience includes configuring Sophos Firewall rules and testing network security controls in a controlled lab. Brings a structured approach to problem-solving, attention to detail and experience collaborating on client and team projects.

TECHNICAL SKILLS

Web & design: WordPress, HTML5, CSS3, JavaScript, PHP, Bootstrap, ASP.NET MVC, jQuery, AJAX, responsive design, Adobe Photoshop, Dreamweaver

Programming & data: Rust, Python, Java, C#, PowerShell, SQL, SQL Server, SQLite, JDBC, API integration, Java Swing, Windows Forms

Security & tools: Sophos Firewall, Kali Linux, Metasploitable 2, Packet Tracer, Microsoft Defender, network segmentation, GitHub, Visual Studio, Microsoft Azure, Unity

Local AI: Ollama, Qwen 1.5B

EXPERIENCE

Coast IT - Learnership

Gqeberha, South Africa | Mar 2026 - 13 Oct 2026

- Built WordPress websites for clients as part of a collaborative development team.
- Configured a Sophos Firewall and conducted controlled testing with Kali Linux and Metasploitable 2 during a two-week work-integrated learning project.
- Completed three months of Sophos engineering, architecture and technical implementation training.
- Developed an AI application that provides conversational responses, coding assistance and web search, and converts uploaded books into saved learning files.

SELECTED PROJECTS

Customer Relationship Management (CRM) System

Contributed to a team-developed CRM supporting lead generation, lead management and sales workflows. Implementation details are confidential under a non-disclosure agreement.

Client WordPress Websites

Built responsive sites with a team, contributing to layouts, styling, content and site functionality.

Sophos Firewall Security Lab

Configured firewall rules and tested Kali Linux attacks against Metasploitable 2 in a controlled lab, applying controls to block simulated attacks.

Locally Hosted AI Prototype

Provides conversational responses, coding assistance and web search, and converts uploaded books into saved learning files.

Caitlin's Book Store

Created an ASP.NET MVC comic-book inventory website with product descriptions, organised data handling and an interactive store-location map.

Student Management System

Developed a C# Windows Forms application for student, teacher and course records with input validation and SQL Server storage.

University Resource Management Application

Built a Java Swing application for faculty, student and course records with add, edit, delete, storage and retrieval functions using SQLite and JDBC.

Simulated Cybersecurity Attack

Modelled a phishing scenario through compromised Wi-Fi in Packet Tracer, assessed firewall and network segmentation controls, and proposed improvements.

Weather Application

Built an ASP.NET MVC weather application using the OpenWeatherMap API, jQuery and AJAX for dynamic updates.

Task Manager List

Developed a Java Swing task manager with add, search, delete, export and SQLite storage functions.

Tax Calculator

Created a C# tax calculator with input handling and error validation.

EDUCATION

Cyber Security - NQF 6

CTU Training Solutions | Mar 2024 - Nov 2025

Software Development - NQF 5

CTU Training Solutions | Mar 2023 - Nov 2023

Web Development and Design - NQF 4

CTU Training Solutions | Feb 2020 - Nov 2021
